The National Association of Small Trucking Companies

Dear Professional Driver,

As a benefit of their membership in the National Association of Small Trucking Companies (NASTC) your company has enrolled in the **Quality Plus Network (QPN)** fuel program. This program offers many benefits for the company and their drivers. The participating truck stops have all agreed to re-price their fuel providing a **“Guaranteed Fair Price” every time you buy fuel.** These discounts allow your company to allow you to buy fuel at many of the nicest truck stops in the country. All you have to do is plan your fuel purchases so that you buy all of your fuel within the network of stops in this directory. Many of the participating stops offer incentives directly to the drivers who purchase fuel from them. As you try more and more of these stops we feel confident that you’ll fall in love with this program. Don’t worry about the price that is advertised at the truck stop; that is not what your company pays! Just stay in the network every time you buy fuel and you will be helping your company buy fuel as smart as they can. Remember your part is easy.

Plan your trip! *Don’t wait until you need fuel to look for a stop.*

Buy only at authorized stops. *There are no discounts out of the network.*

Take advantage of truck stop incentives. *These programs are for the driver, a thank you from the stops. Many stops offer free showers, meal & store discounts and more.*

Remember who your friends are! *The truck stops in this directory want your business and have developed incentive programs for you and offer a **“Guaranteed Fair Price”** on fuel for your company **every time you buy fuel.***

Don’t forget who are not your friends! Truck stops that do not appear in this directory are not part of this program. If one of your old favorite stops is not participating in this program, just tell them **if they want your company’s business they need to be part of QPN.**

This directory is a complete listing of the ONLY AUTHORIZED STOPS in QPN.

Make all of your fuel purchases ONLY at Truck Stops listed in this directory.

Forget about the pump price! Buy in the network **every time!**

Buying in the network consistently will save your company a lot of money over the course of the year. There will be times when the discounts are small or even no discount at all, but there will be times when the discounts are tremendous. Predicting these times is impossible. By buying in network all the time we are guaranteed a fair price on every purchase and since we never pay an inflated margin to the truck stop our average price for fuel is lower. Thanks for your help.

David Owen

President, NASTC

How and why the NASTC QPN Fuel Program works

Having been involved in trucking for many years, I thought that I knew a little something about buying fuel. What I didn’t realize is exactly how little I did know. When NASTC began the developmental work on our Quality Plus Network (QPN) Fuel Program I got an education.

When you think about buying fuel, ask yourself these questions.

How do the oil companies and truck stops make their money?

How much money are they making on a gallon of fuel?

How can my company best save on our fuel costs?

Let’s explore each of these questions in an effort to understand how and why the NASTC Quality Plus Network is the best way for you to buy the fuel you need to operate your trucks.

First of all, oil companies and truck stops make money in a lot of different ways. Many are making more money selling your drivers hot dogs, cold drinks and coffee than they make on fuel. Fuel is a profit center for them though and an important one. You may occasionally encounter a truck stop that is pumping fuel at or below cost for competitive reasons but these situations are very few and far between. Think about your own business for a minute. How much do you make a mile? If your cost per mile is \$1.00 and your freight is paying you \$1.25 then you are making 25 cents a mile. But if you have a 1000-mile run that pays you \$1.50 one way and \$1.00 the other, aren’t you still making 25 cents a mile? Of course you are. Our business would be easy if we could just charge a fair profit margin for every mile we run but it just doesn’t work that way. The oil companies are no different. They have to make a profit on the fuel they pump into your truck. After all the discounts and deals they cut most truck stops are still making substantial margins on each gallon of fuel they pump. If you were asked to haul freight into an area of the country where you knew you’d only be able to average 90 cents a mile coming back home, you’d probably raise your rate on the outbound traffic to make up for the shortcoming on the back haul. This doesn’t make you bad or dishonest; you must charge the higher rate to make a profit. You must consider the loss on the back haul a cost of doing business and compensate for it; truck stops are no different. So if they want to make 8 cents a gallon and they’re pumping fuel at a stop at cost they have to make up for it by getting a higher margin somewhere else. If they discount their fuel to a large carrier they will make up for it by charging more to their other customers. If they’re paying for your fuel card transaction, or incurring other costs to do business with you, they are going to get it back at the pump by adjusting their price of fuel. If they only make 5 cents in June they will make up for it later in the year. **But you can bet on one thing. When the dust clears they are going to make the profit they want to make, or come real close.**

The NASTC Quality Plus Network Fuel Program saves our participating carriers money by effectively moving them from one side of the equation to the other. QPN is currently one of the largest purchasers of over the road diesel fuel in America. When we negotiate with the truck stops we are negotiating with over **35 million gallons of fuel a month**. We negotiate all of our deals for the purchase of diesel on a “cost plus” basis. In other words we pay the truck stop a fair fee above the cost of the product to pump it into our trucks. All of our deals guarantee our participating member that their cost of fuel will be **our negotiated fair price** at that stop **or the retail price, whichever is less**. So in those cases when fuel margins are tight or a location is pumping at a small or zero margin, you will be charged the retail price for the fuel. But when the margin for fuel is greater than our negotiated price, you pay only the negotiated price and the difference shows up as a discount on your billing. The program allows you to take full advantage of any good deals that may be available in the retail market without allowing the oil company to get even with you down the road or later in the year. ***You are not guaranteed the best price each time you buy fuel but you are guaranteed a fair price on every single purchase.***

Over the past several years NASTC members on this program paid an average of less than cost plus 5 cents a gallon for their fuel. If you have confidence, as I do, in the oil companies ability to effectively reach their goal of making 15 to 35 cents a gallon on the fuel they sell, all of a sudden this program makes great sense.

Of course, there is no free lunch. There are costs associated with this program. You must be willing to require your drivers to buy most of their fuel in the discount network. Participating companies sign an agreement to focus their purchases. Our truck stop partners are giving our members a great deal and in return we must give them all the business we can. Because of this requirement to focus your purchases in the discount network this program might not be a good program for a company that is unable or unwilling to direct their driver’s purchases. When you fuel outside the QPN Network of truck stops you will be charged a transaction fee; when buying at network locations there is no transaction fee charged to purchase fuel. In addition to the commitment to focus, participation in this program is limited to active NASTC members.

Pricing is just one part of the fuel buying equation that is addressed by QPN; the Q is for Quality. When your company participates in the Quality Plus Network, your drivers will have access to some of the finest truck stops in the country. Many of you would probably be upset with a driver that purchased fuel at one of the higher quality stops and paid a premium for the fuel. When your driver is buying at QPN stops he will have access to high quality stops with many of the amenities that drivers need to make their lives on the road a little more bearable, and the fuel they purchase at these stops will have the QPN guaranteed fair pricing. So your company not only realizes a saving on your fuel bill, you get a healthier and happier driver at the same time. With QPN the driver has options. He will be able to purchase fuel along his route and make his fuel purchasing decisions based on whether it’s time to rest, eat or just fuel and get back on the road. We monitor the price to ensure you always pay a fair price for fuel.

NASTC learned a long time ago that becoming an expert is a little harder than finding an expert. We didn’t wake up one morning smarter than the rest of the world in fuel or anything else. We did set out to find experts in fuel management to help us develop and manage QPN for our members. Bob Kelso who is a recognized expert in fuel management, administers the day-to-day operation of our fuel network. Fleet One, a leading provider of fuel card and cash advance services to trucking, administers our fuel card.

Please review this directory to make sure you will be able to buy the vast majority of your fuel in the network. Make sure your drivers understand how important it is to buy from the network stops. If you have any questions about our Quality Plus Network Fuel Program or feel that I can be of service to you in any way, please give Erik Lamb a call at 1-800-264-8580.

Sincerely,

Buster Anderson

Executive Vice President, NASTC
